FISH.—It has been suggested that Fresh Fish is an
unheality diet, and supervision has led many to believe it without so much as giving our thought why it is so. Daily observations
prove the easertion false. Where do we find a more hardy or heality
class of people than those who follow the bosiness, for which there
are thousands?) Look throughout the Eastern States, the British Provinces. &c., portions of which the people's principal diet is Fish
Do we hear of any prevailing epidemics among them caused from the
use of Fish? What article of consumption will people pay as high as
unsafets! What article of consumption will people pay as high as
three or four shiftings per pound for, with the exception of Fish?
Then again, for citizens in lower circumstances, what can'they purchase for less money? One shifting worth of Fish will many times
arrve a large family. Why should citizens, or a pertion of the community, be deprived of that luxury from believing an assertion that
has not one particle of proof? The writer will here challenge any
physician to prove that a temperate use of Fresh Fish (of any linds
ever brought disease upon man. The writer up to see to understand the nature of disease, and is ready at any time to discuss the
analyce (through the press) with any celebrated physician, or have
his skill tested by the most critical cases in a hospital or presse SanBy. Written by WM. C. VAIL, No. 8 Peplares. Broodlyn, L. I.
